

PRECISION

Golf Trolleys

S-Digital-18/36

The latest ergonomic robust design makes the precision golf trolley one of the best and most reliable in the market today. The golf trolley has been designed for the most arduous of golf course's by not only the strength of design but the top quality parts. An example of this can be seen in our technical specifications of the battery. Very few manufacturers provide 18 hole specification battery of 26Ah in capacity with a life cycle of 400/500 cycles and DOD of over 90%. Precision Golf Trolleys believe their manufacture of golf trolleys should be the best and therefore no expense is spared in the technical and material specifications.

- Robust aero grade aluminium composite alloy frame
- CSS (Computer Control System) – monitor and read-outs
- Easy fold design for one piece fold down
- Top quality efficient 26Ah or 36Ah long life cycle battery
- EBS (Electronic Brake System)

Descriptions:

T Shaped handle provides computer controlled on-board diagnosis systems to monitor your golf trolley and give you an up to date read out of battery capacity, speed, settings, remote distance functions.

Computer Control Systems (CSS) - handle

1. Speed control knob
2. Electronic off/on switch
3. Electronic brake for GO or STOP
4. Remote Auto-Distance function of 10/20/30 metres.
5. LED read-out on all of the above
6. Battery monitoring system, on constant read-out.

Technical Specifications

S Frame Wheels and Components

Low profile tyres and lightweight composite wheels add to the design of this electric trolley, making this electric trolley one of the lightest around. The composite aero grade aluminium and alloy frame is specifically engineered to provide stability and a robust support to the golfers' bags and on various golf courses.

1. High Tech composite rubberised adjustable front and wide tracked rear wheels
2. Aero grade lightweight aluminium composite alloy frame.
3. Powerful noiseless new 200 watt drive system.
4. New design enclosed control systems box works together with CSS.
5. Ideal T design handle for left hand of right hand.

Technical Specifications

Dimensions UP	119 x 52 x 104 cm
Dimensions folded	84 x 49 x 37 cm
Weight	20Kg (approx)
Weight no battery	9.3 kg
Warranty	1 year
Motor	200 Watt
Battery capacity	26 Amp Hour (S-Digital-18) , 36 Amp Hour (S-Digital-36)
Battery life	400 – 500 DOD cycles over 80%
Charge indicator	High – Medium - Low
Cruise control	
LED Read-out	
Auto Distance	10 metre 20 metre 30 metre buttons
Freewheel function	
Electronic brake	GO and STOP buttons
Maximum Speed	8.5 km/h
Range	22km or 13miles one charge 26Ah
Charging time	5 – 8 hours
Gradient	16 Degrees
Weight capacity	30Kg
